

SAFETY MESSAGE

Personal safety is our # 1 priority

Lightning, Compiled by USDA-APHIS-CCEP

Thunderstorm danger signs:

- Dark or threatening clouds.
- Distant lightning and thunder.

Facts about lightening:

- Because light travels much faster than sound, lightning flashes can be seen long before the thunder is heard.
- Estimate the number of miles you are from a thunderstorm by counting the number of seconds between a flash of lightning and the next clap of thunder.

If outdoors:

- Attempt to find shelter.

If unable to find shelter do the following!

Lightning strike pose:

- Crouch down so that all your weight is on the balls of your feet.
- Place your hands over your ears.

If you are in a vehicle, pull over to the side of the road safely, and simply place your hands across your lap.
